PhD Research Work

- Jan 2014-June-2020  **Understanding Transfer Learning between Domains and Tasks**,
Prof. K S Venkatesh and Prof. Vinay P. Namboodiri
Analyzed and tackled the different problems of faced in domain adaptation. We proposed variety of techniques such as improved discriminator and considering distribution based adaptation. By obtaining uncertainty and through these localized adaptation has been proposed. In next work, we proposed a attention and uncertainty based models for task incremental learning. We tackled the domain adaptation problems without avail the source data.

Masters Research Work

- July 2013-June-2014  **Human Hand Gesture Recognition from 3D Data,**
Prof. K S Venkatesh
The objective was to develop efficient algorithms to detect hand gestures in varying light conditions, irrespective of background clutter. The hardware used was Kinect sensor from Microsoft. Human hand constellation identified from the 3D data to identify the hand. The proposed algorithm and system works in varying light conditions, background clutter and any human pose.
